RESEARCH INTEREST

I am a first-year Ph.D. student at KAIST AI, advised by Prof. [Hyunjung \(Kate\) Shim](#). Before joining KAIST, I conducted research with Prof. [Ran](#) at the CAVH Research Group at University of Wisconsin–Madison and with Prof. [U Kang](#) at the Data Mining Lab at Seoul National University. I later worked with Prof. [Insik Shin](#) in the Agentic AI Group at FLUIZ AI and Dr. [Jinhan Lee](#) in the Autonomous Driving Group at NAVER LABS. My research interests include **Multimodal Learning**, **Vision-Language Models**, and **Agentic AI**.

EDUCATION

Kim Jaechul Graduate School of Artificial Intelligence, KAIST PhD in Artificial Intelligence Advisor: Prof. Hyunjung (Kate) Shim	Jan. 2026 – Present
Kim Jaechul Graduate School of Artificial Intelligence, KAIST Master of Science (MS) in Artificial Intelligence Advisor: Prof. Hyunjung (Kate) Shim	Jan. 2024 – Dec. 2025
University of Wisconsin-Madison Bachelor of Science (BS) in Computer Science Bachelor of Science (BS) in Data Science	Jan. 2017 – Dec. 2022 GPA: 3.9/4.0 Dean's List Recipient

RESEARCH PUBLICATION

C: CONFERENCE J: JOURNAL P: PREPRINT

- C.1. **Hojun Choi**, Seulbin Hwang, Dae Jung Kim, Kisung Kim, Hyunjung Shim[†], and Jinhan Lee[†], “*Open-Vocabulary BEV Segmentation with 3D-Aware Geometric Constraints*,” [European Conference on Computer Vision \(ECCV\)](#), 2026
- C.2. **Hojun Choi**, Youngsun Lim, Jaeyo Shin, and Hyunjung Shim, “*CoT-PL: Chain-of-Thought Pseudo-Labeling for Open-Vocabulary Object Detection*,” [2nd Workshop on Multimodal Spatial Intelligence @ CVPR \(CVPRW\)](#), 2026
[European Conference on Computer Vision \(ECCV\)](#), 2026
- C.3. Youngsun Lim*, **Hojun Choi***, and Hyunjung Shim, “*Evaluating Image Hallucination in Text-to-Image Generation with Question-Answering*,” (*Equal contribution)
[Oral Presentation] [AAAI Conference on Artificial Intelligence \(AAAI\)](#), 2025
- C.4. Sunjae Lee, Junyoung Choi, Jungjae Lee, Munim Hasan Wasi, **Hojun Choi**, Steven Y. Ko, Sangeun Oh[†], and Insik Shin[†], “*MobileGPT: Augmenting LLM with Human-like App Memory for Mobile Task Automation*,” [ACM International Conference on Mobile Computing and Networking \(MobiCom\)](#), 2024
- C.5. Seungcheol Park, **Hojun Choi**, and U Kang, “*Accurate Retraining-free Pruning for Pre-trained Encoder-based Language Models*,” [International Conference on Learning Representations \(ICLR\)](#), 2024
- P.1. Wonjeong Ryu, Seungjun Yu, Seokha Moon, **Hojun Choi**, Junsung Park, Jinkyu Kim, and Hyunjung Shim, “*SUPER-AD: Semantic Uncertainty-aware Planning for End-to-End Robust Autonomous Driving*,” *Preprint*, 2025
- P.2. **Hojun Choi**, Junsuk Choe, and Hyunjung Shim, “*Sampling Bag of Views for Open-Vocabulary Object Detection*,” *Preprint*, 2024

ACADEMIC EXPERIENCE

Research Intern

NAVER LABS Corp.

May 2025 – Nov. 2025

Seongnam, South Korea

- Conducted research with Dr. Jinhan Lee on end-to-end planning for autonomous driving.
- Developed VLM-based approaches for open-world perception and explored 3D Gaussian Splatting for efficient real-time processing.
- Independently implemented models, designed experiments, and conducted evaluations for the projects.
- Authored a first-author paper accepted to [ECCV 2026](#)!

Research Intern

FLUIZ AI

Sep. 2023 – Feb. 2024

Seoul, South Korea

- Conducted research under Prof. Insik Shin in the Agentic AI Group of the CPS Lab at KAIST.
- Developed memory-augmented LLM agents for web/mobile task automation using structured web/app memory.
- Built real-time, screenshot-based UI Mirroring technology for enterprise ERP platforms, enabling coordinate-level interaction while avoiding iframe and direct DOM access restrictions.
- Co-authored a paper published at [ACM MobiCom 2024](#)!

Research Intern

Data Mining Lab at Seoul National University

Jan. 2023 – Jul. 2023

Seoul, South Korea

- Conducted research with Prof. U Kang in the Model Compression Group of the Data Mining Lab.
- Developed an offline, retraining-free pruning method for pretrained encoder-based language models.
- Co-authored a paper published at [ICLR 2024](#)!

Undergraduate Research Intern

CAVH Research Group at University of Wisconsin-Madison

Sep. 2022 – Dec. 2022

Wisconsin, USA

- Conducted research with Prof. Ran on end-to-end driving perception using a DETR-style architecture.
- Built a custom CARLA environment modeling a university campus to evaluate delivery-robot driving models.

PROFESSIONAL SERVICES

- **Conference Reviewer:** CVPR [2026, 2024], ECCV 2026, ICLR 2026, AAAI 2026, NeurIPS 2025
- **Journal Reviewer:** TPAMI 2025

- **Teaching Assistant:** Computational Image Generation and Manipulation (AI62100). Spring 2026
- **Research Assistant:** KT-AI Convergence Education Program. Fall 2023
- **Academic Mentor:** Introduction to Human Computer Interactions (CS570). Fall 2022
- **Academic Mentor:** Introduction to Artificial Intelligence (CS540). Fall 2022
- **Academic Mentor:** Elementary Matrix and Linear Algebra (CS340). Spring 2022
- **Academic Mentor:** Introduction to Computer Systems (CS354). Spring 2022
- **Academic Mentor:** Programming III (CS400). Spring 2022
- **Academic Mentor:** Elementary Matrix and Linear Algebra (CS340). Fall 2021
- **Academic Mentor:** Introduction to Computer Engineering (CS252). Fall 2021

AWARDS

- **Best Poster Award**, Image Processing and Image Understanding (IPIU), 2026
- **Oral Presentation**, Image Processing and Image Understanding (IPIU), 2025
- **Top 10%**, Autonomous Sensor Antenna Prediction Competition, LG Research AI, 2022
- **Honorable Mention**, UPL Hatathon, 2022
- **Dean's List Recipient**, University of Wisconsin-Madison, Every Semester Attended
